

GAYTRI DATTATRAYA KOLHE

Java Backend Developer · Spring Boot · REST APIs · Microservices · MySQL · JWT
Pune, MH · +91-7219786270 · gaytrikolhe2001@gmail.com · github.com/Gaytrik

PROFESSIONAL SUMMARY

Results-driven Java Backend Developer with 1 year of production experience building REST APIs and microservices using Java 17, Spring Boot, Spring Security (JWT/RBAC), JPA/Hibernate, MySQL, and MongoDB. Shipped 15+ endpoints across e-commerce and food delivery backends in Agile teams. Focused on clean API design, secure authentication, and scalable backend architecture.

TECHNICAL SKILLS

Languages:	Java 8, Java 17, SQL, JavaScript
Backend:	Spring Boot, Spring MVC, Spring Security, JPA/Hibernate, JDBC, REST APIs, Microservices
Databases:	MySQL, MongoDB, PostgreSQL
Tools:	Git, GitHub, Maven, Postman, IntelliJ IDEA, Cloudinary, Razorpay
Concepts:	JWT Auth, RBAC, OOP, MVC Architecture, Agile/Scrum, API Design

PROFESSIONAL EXPERIENCE

Software Developer	RBricks Technology, Pune	Jun 2025 – Present
- Engineered 15+ production REST APIs using Spring Boot and Spring MVC for product catalog, cart, and order-tracking modules across e-commerce and food delivery platforms. - Secured all API endpoints with Spring Security — implemented JWT-based stateless authentication and role-based access control (Admin/User), eliminating unauthorized endpoint access. - Optimized MySQL and MongoDB queries for high-read inventory and order modules; applied indexing strategies to reduce query execution time on critical data paths. - Delivered features in 2-week Agile sprints; enforced clean Git branching strategy (feature → dev → main) and participated in daily stand-ups and code reviews.		

PROJECTS

E-Commerce Platform — Microservices Backend

Tech: Java 17 · Spring Boot · Spring Security · JWT · JPA/Hibernate · MySQL · Microservices · React.js · Razorpay · Cloudinary

- Designed microservices architecture with independent Auth, Product, Cart, and Order services; defined REST contracts between services to reduce coupling and enable independent deployability.
- Built 10+ REST APIs for full CRUD, JWT auth, and RBAC; integrated Razorpay payment gateway and Cloudinary CDN for end-to-end purchase and media management workflows.

Food Delivery Application — API Backend

Tech: Java 8 · Spring Boot · MongoDB · Microservices · JWT · Razorpay · Cloudinary

- Developed REST APIs for restaurant listing, dynamic menu management, and real-time order tracking; used MongoDB document model to handle variable menu schemas across vendors.
- Implemented JWT authentication with role-based access (Admin/Customer); integrated Razorpay for multi-restaurant payment flows.

URL Shortener Service — Spring Boot REST API

Tech: Java 17 · Spring Boot · MySQL · JPA/Hibernate · REST APIs · Postman

- Built a RESTful URL shortener with custom alias support, expiry management, and redirect tracking; exposed clean REST endpoints for create, resolve, and analytics operations.
- Designed normalized MySQL schema with indexed short-code lookups; implemented request validation and global exception handling for robust, production-ready API behavior.

EDUCATION

B.E. Computer Science & Engineering	LoGMIEER, Nashik (SPPU)	CGPA: 8.0/10 · 2020–2023
Diploma in Computer Engineering	K.K. Wagh Polytechnic, Nashik	85% · 2017–2020

CERTIFICATION

Java Full Stack Development (Jul 2023 – Jun 2024) — Spring Boot · REST APIs · MySQL · MongoDB · Hibernate · Git
